Professional Experience

Senior Project Engineer,
Wipro Limited, (Client Account: SAP)
May 2019 – present | Bengaluru, India

- Designed and developed complete solutions using **Microsoft Power Platform**, with a focus on building **user-friendly canvas** and **model-driven apps** to address **complex business requirements**.
- Built and optimized **custom canvas applications** for complex scenarios, ensuring **excellent user experience** and **visual appeal** using **UI skills**.
- Streamlined and automated **business workflows** by developing **Power Automate flows**, including **complex workflows**, to reduce **manual tasks** and improve **process efficiency**.
- Merged data from multiple **SharePoint lists** using **JSON manipulation**, optimizing **data processing speed** and avoiding **looping operations**.
- Worked with various **data sources** like **Dataverse**, **SharePoint**, and **SQL** to build **integrated applications**.
- Used **complex PowerApps formulas** and development techniques to address **business requirements**.
- Built **reusable components** for canvas apps and **custom pages** for model-driven apps, improving **development speed** and **maintaining consistency**.
- Developed **custom connectors** for **Power Apps** and **Power Automate** to connect with **external data sources**, enhancing **application versatility** and **functionality**.
- Leveraged **AI Builder** and **Co-Pilot Studio** to incorporate **intelligent** and **interactive features**, enriching **user engagement** and boosting **operational efficiency**.
- Ensured **high-performance applications** by **optimizing Power Apps** and **flow configurations**, applying **best practices** for **error handling** and **exception management**.
- Followed **security best practices**, including **role-based access control**, **data encryption**, and **data governance**, to protect **sensitive information** and ensure **compliance**.

Skills

- PowerApps (Canvas and Model-Driven Apps)
- Power Automate (Microsoft Flow)
- Copilot Studio
- Agile project management
- Dataverse, SharePoint & SQL
- Solution ALM and Governance
- D365 CRM
- HTML, CSS and Javascript
- Figma
- M365 Suite (Outlook, Word, Excel, PowerPoint, Teams, OneDrive)
- Problem-solving and continuous learning
- Custom Connectors and Business Process Flows
- Generative AI
- Utilized **adaptive cards** for **dynamic** and **responsive content presentation**, enhancing **communication** and **user engagement** across **M365 apps**.
- Provided **ongoing support** for **PowerApps** and **Power Automate**, quickly **resolving issues** to minimize **downtime**.
- Documented solutions thoroughly to enhance **knowledge sharing** and provide clear **guidelines** for **troubleshooting**.
- Communicated effectively with **stakeholders** and **team members**, both **verbally and in writing**, to ensure **smooth collaboration**.
- Wrote **detailed application documentation** to maintain **transparency** and support **future development** and **maintenance** efforts.
- Modernized **traditional forms** and **workflows** using the **Power Platform**, greatly improving **efficiency** and **user satisfaction**.
- Familiar with the core concepts and functionalities of **Microsoft Dynamics 365 CRM**, with foundational knowledge gained through learning and exploration.
- Trained **end-users** and **stakeholders** on **Power Platform solutions**, helping them become **more proficient** and **effective**.
- Provided **first-line support** for **PowerApps** and **Power Automate**, quickly **addressing issues** to keep **operations running smoothly**.
- Supported the **Microsoft 365 Enterprise application suite**, including **Outlook, Word, Excel, PowerPoint, Teams**, and **OneDrive**.
- Experienced with **Git** and **GitHub** for **version control**, enabling **efficient collaboration** and maintaining **clear, organized development history**.
- Set up and configured **SharePoint Online sites** to improve **collaboration** and **document management**.
- Gained foundational experience with **SAPUI5**, **Node.js**, and **SAP BTP**.
